### 1 [Panther: a specification system for graphical controls](#)

J. I. Helfman

 May 1986 **ACM SIGCHI Bulletin**, Proceedings of the SIGCHI/GI conference on Human factors in computing systems and graphics Interface CHI '87, Volume 17 Issue SI

Publisher: ACM Press

Full text available: [pdf\(571.65 KB\)](#)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

An experimental graphical control specification system, called Panther, has been written in C for UNIX®-based applications. Unlike similar systems, which focus on combining interaction techniques, Panther allows the specification of low-level interactions by invoking user-selectable subroutines for input-device transitions. A Panther Interface is specified in a textual table as a set of hierarchically nested regions. Regions can model any control device, such as menu bu ...

**Keywords:** graphical controls, graphical interface specification, graphical user interfaces

### 2 [User Format Control in a LISP Prettyprinter](#)

Richard C. Waters

 October 1983 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 5 Issue 4

Publisher: ACM Press

Full text available: [pdf\(1.25 MB\)](#)
 Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

### 3 [An approach to multidimensional data array processing by computer](#)

Mervin E. Muller

 February 1977 **Communications of the ACM**, Volume 20 Issue 2

Publisher: ACM Press

Full text available: [pdf\(1.80 MB\)](#)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Some recent work on the development of general-purpose computer-based statistical and data processing capabilities for handling multidimensional arrays of data is presented. Attention is first given to some of the general problems of multidimensional table and array processing. This is followed by a summary of some recent developments in array processing capabilities at the World Bank, in particular, the system identified as WRAPS (World Bank Retrieval and Array Processing System).

**Keywords:** array processing, computing techniques, cross tabulation, data processing, data retrieval, statistical analysis, syntax for data structures, table processing, time series

### 1 [Fast detection of communication patterns in distributed executions](#)

Thomas Kunz, Michiel F. H. Seuren

 November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

 Full text available: [pdf\(4.21 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

### 2 [GPGPU: general purpose computation on graphics hardware](#)

David Luebke, Mark Harris, Jens Krüger, Tim Purcell, Naga Govindaraju, Ian Buck, Cliff Woolley, Aaron Lefohn

 August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes GRAPH '04**

Publisher: ACM Press

 Full text available: [pdf\(63.03 MB\)](#)

 Additional Information: [full citation](#), [abstract](#)

The graphics processor (GPU) on today's commodity video cards has evolved into an extremely powerful and flexible processor. The latest graphics architectures provide tremendous memory bandwidth and computational horsepower, with fully programmable vertex and pixel processing units that support vector operations up to full IEEE floating point precision. High level languages have emerged for graphics hardware, making this computational power accessible. Architecturally, GPUs are highly parallel s ...

### 3 [Spoken dialogue technology: enabling the conversational user interface](#)

Michael F. McTear

 March 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 1

Publisher: ACM Press

 Full text available: [pdf\(987.69 KB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Spoken dialogue systems allow users to interact with computer-based applications such as databases and expert systems by using natural spoken language. The origins of spoken dialogue systems can be traced back to Artificial Intelligence research in the 1950s concerned with developing conversational interfaces. However, it is only within the last decade or so, with major advances in speech technology, that large-scale working systems have been developed and, in some cases, introduced into commerc ...

### 1 [User-centered abstractions for adaptive hypermedia presentations](#)

Dick C. A. Bulterman

 September 1998 **Proceedings of the sixth ACM international conference on Multimedia**

Publisher: ACM Press

 Full text available: ☒ [pdf\(1.15 MB\)](#)

 Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** CMIF, GRINS, SMIL, accessibility, hypermedia Interfaces, user-centered adaptability

### 2 [A reliable multicast webcast protocol for multimedia collaboration and caching](#)

L. Kristin Wright, Steven McCanne, Jay Lepreau

 October 2000 **Proceedings of the eighth ACM international conference on Multimedia**

Publisher: ACM Press

 Full text available: ☒ [pdf\(1.10 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Large-scale, multi-point, multimedia conferencing applications designed to facilitate long-distance collaboration are enjoying growing popularity. Usually composed of real-time audio, video and shared-drawing applications, these collaborative environments help render the geographical location of collaborators irrelevant. To complement these existing collaborative applications, it would be useful to have the ability to distribute documents synchronously over the World Wide Web (WWW). One model ...

### 3 [The state of the art in locally distributed Web-server systems](#)

Valeria Cardellini, Emiliano Casalicchio, Michele Colajanni, Philip S. Yu

 June 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 2

Publisher: ACM Press

 Full text available: ☒ [pdf\(1.41 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The overall increase in traffic on the World Wide Web is augmenting user-perceived response times from popular Web sites, especially in conjunction with special events. System platforms that do not replicate information content cannot provide the needed scalability to handle large traffic volumes and to match rapid and dramatic changes in the number of clients. The need to improve the performance of Web-based services has produced a variety of novel content delivery architectures. This article w ...
